

Richard Burns Rally / Conflict: Vietnam

SecuROM DVD Issues

It has been brought to our attention that the copy-protection system employed in this title may have difficulties with some models of DVD drives currently on the market. If you are indeed suffering this problem with running this title and feel that this may be affecting you, please read on...

SecuROM have a special analysis routine integrated in every SecuROM protected executable file. A log file is created containing information about the authentication behaviors of the drives of the regarding system.

Instructions how to create such a file are outlined below. With this file SecuROM are able to find the reason for the anomaly.

- Make sure that the original disc is in your local DVD-ROM drive.
- Reboot your computer but DO NOT start any applications.
- Click with the right button of your mouse onto the link on your desktop. *If you have deleted the link please click with the right button of your mouse on the protected executable file 'RichardBurnsRally.exe' or 'Vietnam.exe' in the installed path itself, the default installation path would be:*

C:\Program Files\SCi Games\Richard Burns Rally

C:\Program Files\SCi Games\Conflict Vietnam

- A context menu will appear, select "LAUNCH ANALYSIS" within this menu.
- After selection a disclaimer window will appear on your screen, to proceed, please click the "YES" button.
- This 'analysis' will now generate an 'AnalysisLog.sr0' file within the root of your C:\ partition.
- Please zip that file and send it the following email address' with a brief description of the issues you are encountering:

support@securom.com

techsupport2@sci.co.uk

- In addition please include your disc number. You can find that number in the inner ring on the data side.

This picture will help you finding the number.
